Instructor:  K.C. Nicolaou, BRC 363
kcn@rice.edu, 713-348-8860

Office Hours:  By appointment. There is a TA for this course.

Goals:  This course, based on the recent book by Nicolaou and Montagnon, will expound on our learned knowledge of some of Nature’s most intriguing molecules and the ability of Man to discover, synthesize, modify and use them to our advantage in what was not formerly envisioned. Through the development of the theme, it is hoped that one will also discover just how profound the impact of chemistry is in our lives. The course will also explore some of the most exciting frontiers in modern science and medicine, and the opportunities they present to young students for future careers. The lectures will touch upon fascinating tales about molecules and their presence in, among many items, foods, perfumes, dyes, high tech materials, textiles, vitamins, nutritional supplements, pesticides, insecticides, and medicines.

Prerequisites:  CHEM 212 or 320

Lectures and Tutorials:  Lectures will be held in the BioScience Research Collaborative (BRC), Room 285, on Tuesdays and Thursdays from 8:00 – 9:15 a.m. Tutorials will be held in BRC, Room 308, from 7:00 – 8:00 p.m. on Thursday nights.

Exams and Assignments:  Exam:  A comprehensive exam will be given on Thursday, February 25 during the normal class period. No make up exams will normally be allowed.

Assignment 1:  Choose one chapter from the book *Molecules That Changed the World* not presented in class (Chapters 3, 5, 12, 14, 17, 20, or 26), and write a one-page, single spaced essay on it. Your essay should include the discoverer(s), the molecular structures, and the mechanism of action of your molecules, as well as other significant facts. Grading will be based on content, organization, and accuracy.

Assignment 2:  Write a one-page, single spaced essay on the book *Molecules That Changed the World* summarizing the essence of its contents and emphasizing what you learned from reading it. Grading will be based on content, organization, and clarity.

Reading before each class:  By doing so, you will be able to participate in class more effectively.

Grades:  Exam: 250 points  
Assignment 1: 125 points  
Assignment 2: 125 points

Disabilities:  Student disabilities will be accommodated in accordance with the guidelines put forth by Disability Support Services (DSS). Students should register with the DSS Office in Allen Center and let the instructor know of their disabilities and needs as soon as possible.

Honor Code:  The Rice University Honor Code applies to this course. Both assignments 1 and 2 are to be exclusively the work of each individual student. Proper references must be given to any original work when included in these home assignments.
| Week 1  | Tuesday, Jan 12 | Lecture 1 | Introduction: Atoms, Molecules & Synthesis | Chapter 1  
|         |                |          | Urea & Acetic Acid                          | Chapter 2  
|        | Thursday, Jan 14 | Lecture 2 | Aspirin® Terpineol                         | Chapter 4  
|        | Tuesday, Jan 19 | Lecture 3 | Tropinone Haemin Quinine                   | Chapter 7  
|        | Thursday, Jan 21 | Lecture 4 | Morphine Steroids & the Pill               | Chapter 10 
| Week 2 | Tuesday, Jan 26 | Lecture 5 | Penicillin Prostaglandins & Leukotrienes   | Chapter 13 
|        | Thursday, Jan 28 | Lecture 6 | Vitamin B<sub>12</sub> Monensin            | Chapter 16 
| Week 3 | Tuesday, Feb 2  | Lecture 7 | Avermectin Ginkgolide B                   | Chapter 19 
|        | Thursday, Feb 4 | Lecture 8 | Cyclosporin, FK506 & Rapamycin Calicheamicin<sub>γ<sub>1</sub></sub> | Chapter 22  
| Week 4 | Tuesday, Feb 9 | Lecture 9 | Palytoxin Taxol®                          | Chapter 24  
|        | Thursday, Feb 11 | Lecture 10 | Brevetoxin B Ecteinascidin 743             | Chapter 27  
| Week 5 | Tuesday, Feb 16 | Lecture 11 | Epothilones Resiniferatoxin               | Chapter 29  
|        | Thursday, Feb 18 | Lecture 12 | Vancomycin Thiostrepton                   | Chapter 31  
| Week 6 | Tuesday, Feb 23 | Lecture 13 | Small Molecule Drugs Biologics            | Chapter 33  
|        | Thursday, Feb 25 | Lecture 14 | Exam                                      | Assignments 1 and 2 due by Tuesday, March 1 |
